  - Breast Biopsies**  
Ultrasound-guided  
Stereotactic
  - Blood Composition Analysis**

## New Year's Resolutions from the team at IFW:

Marianne: I'm not putting the dumbbells down until I feel great in the gown!

Rachel: I'd like to hike a different Missouri State Park every month.

Cristina: Get Ozzy (the puppy) trained to be a civilized member of society.

Mary: Spend more time with my siblings.

Jamie: I would like to bike the MS 150... maybe.

## Go Chiefs!

Time is like a flowing river,  
no water passes  
beneath your feet twice.

Much like the river,  
moments never pass you by again,  
so cherish every moment  
that life gives you and have  
a wonderful New Year.

## Happy Holidays from Imaging For Women

We here at Imaging for Women would like to first start by saying thank you for letting us be a part of your patients' care again this year. It has always been our mission to provide the best possible care and highest possible imaging quality to our patients while also keeping their cost as low as we can, and we have had another great year doing exactly that. We hope that you have had a great year as well and hopefully were able to spend some time with friends and family this holiday season.

It has been an exciting year for us at IFW. In July, we welcomed a new radiologist to the team, Dr. Allison Zupon. As many of you know, Dr. Zupon completed both her residency and breast imaging fellowship here in Kansas City at KU. She has made an excellent addition to the team and patients have had nothing but wonderful things to say about her. It is nice for patients to now have the option of seeing a female radiologist if that is their preference. We feel very blessed to have her on our team.

We also made some changes to our reception area this fall. It was time for some interior decorating change so we gave the office a fresh coat of paint in a new color, put in new furniture, and even had a new 3D sign printed. We are very pleased with the outcome, and many patients have commented on how they like the new look. If your office is looking to make any changes in these areas, we would be happy to have you come by and see how things turned out and refer you to who we used. They all did excellent work.

We are looking forward to the upcoming year and continuing to provide the best possible care to our patients. If you have any requests or thoughts of how we can improve something (either for you or your patients), please let us know and we will make every possible effort to accommodate you. We have been asked a few times recently if we perform general Ultrasound on male patients and the answer is yes. Please do not hesitate to use our facility for any patient needing an ultrasound. We are always happy to help.

Best Regards and Happy New Year,

Troy Voeltz MD, DABR, CCD
